RE: The Callier Center Satellite Facility  
The University of Texas at Dallas

Dear Juan,

I wanted to express my sincere appreciation for the work performed by Castro Roofing of Texas on the Callier Center Satellite Facility project. As you are aware, this project had its share of opportunities that had to be overcome. Castro Roofing's construction team was instrumental in providing knowledgeable assistance and input that was critical in allowing us to overcome the existing design and aesthetic issues. In addition, your field crews demonstrated great competence and craftsmanship during the unique and difficult roof installation.

With this effort, Castro Roofing of Texas was a valuable asset to our construction team and played a major role in Adolfson and Peterson's project success. We look forward to working with you again in the future.

Thanks again,

Granger Hassmann  
Project Manager  
Adolfson and Peterson
